Below is a online game for Mastermind. If you click the "play the game" at the end of the page it will take you to a page with a bunch of logic games you could also try, however you want to click the second link for "Mastermind".

Double click the color you want and place it in the whole you want to put it. Then click the next color you want and it will replace your *holding color*. Be aware the colors are a little different, also correct color, wrong spot is still white, BUT correct color, correct spot is red.
