SUBJECT: District Technology Network Issues

The Wallenpaupack Area School District's technology network has been compromised by a ransomware intrusion. School districts across the country have been experiencing cyber security issues as it relates to ransomware. Our technology team, along with our cyber security consultant, has been working to restore our operating systems to full functionality. Through their assessment of the systems, it appears there has been no compromise of individual student or employee information. We will be forwarding information to the FBI CYWATCH team which is investigating these incidents in an effort to eliminate this type of criminal activity against logistics companies, technology companies, municipalities, financial services and educational institutions. As we work on restoring our systems you may experience login problems.

We are attempting to get Powerschool and all educational programming operational as soon as possible. Thank you for your patience and cooperation.
